Work Experience

Raphael Porcelain
Automation Engineer

Remote
October 2025 - Current

- Architect and maintain 15+ production automation workflows using n8n, processing competitive intelligence data from 6+ social media platforms daily
- Design AI-powered analysis pipelines integrating OpenAI API with vector databases (Qdrant/MongoDB) for Retrieval Augmented Generation
- Build lead generation automation with Clay.com and Salesforce CRM, reducing manual data entry by 20+ hours/week
- Develop Python and JavaScript scrapers for business intelligence gathering, achieving 95%+ data accuracy
- Rebuilt lead enrichment as a FastAPI and React app on the OpenAI Batch API with RBAC, a review UI, and CI/CD deployment
- Collaborate with cross-functional stakeholders to translate business requirements into scalable technical solutions

AI Buddy Catalyst Labs
Automation Development Intern

Remote
May 2025 - October 2025

- Built n8n AI agents and a FastAPI content pipeline that chains five LLMs in sequence
- Published insta_rag, a configuration-driven RAG library, to PyPI with tests and an automated release workflow
- Wrote Ansible playbooks and GitHub Actions CD for a kubeadm Kubernetes cluster with Tailscale and cert-manager
